

## Psychiatric Acute Care Clinic Chateau Gracht

The historic moated castle, Schloss Gracht, and its interior aesthetic, characterize the private psychiatric clinic, whose therapeutic concept is supported by the high-quality design of the rooms. Among the most striking design-features are the harmonious and finely differentiated material and color concept, the respect for the original structure of the monument, and the integration of modern, contemporary components. Overall, these aspects have created an atmosphere that contributes to an important physical sensibility and an emotional experience in the present. Simultaneously diverse and harmonious, inviting and positive spaces have been created, which help patients in their recovery through the quality of their stay. At the same time, the charm of the castle is preserved, and the healthcare facility is brought to life.
